

**\*\*This is the exact checklist that all of our employees review before being hired here\*\***

**Lawn checklist:**

Everything on this list must be done for each property that is being maintained.

- Lawn cut (3in-4.5in)
- Perimeter of property weed whacked (along the house and across the fence line)
- Weed whack any slope or area that the mower can't reach
- Weed whack around trees, mailboxes, pools, trampolines etc.
- Weed whack the section where the curb and street meet
- Weed whack anything in between cracks in the concrete (if specified on property)
- Edge sidewalks, patios, driveways
- Leaf blow everything off the sidewalk, patios, driveway, and any clippings that may have gotten into the mulch/rock beds. There should be no clippings anywhere except the on the lawn. (leaf blow very lightly to avoid blowing out mulch)
- **Close gate**

You do not leave a property until this list is complete.
